---

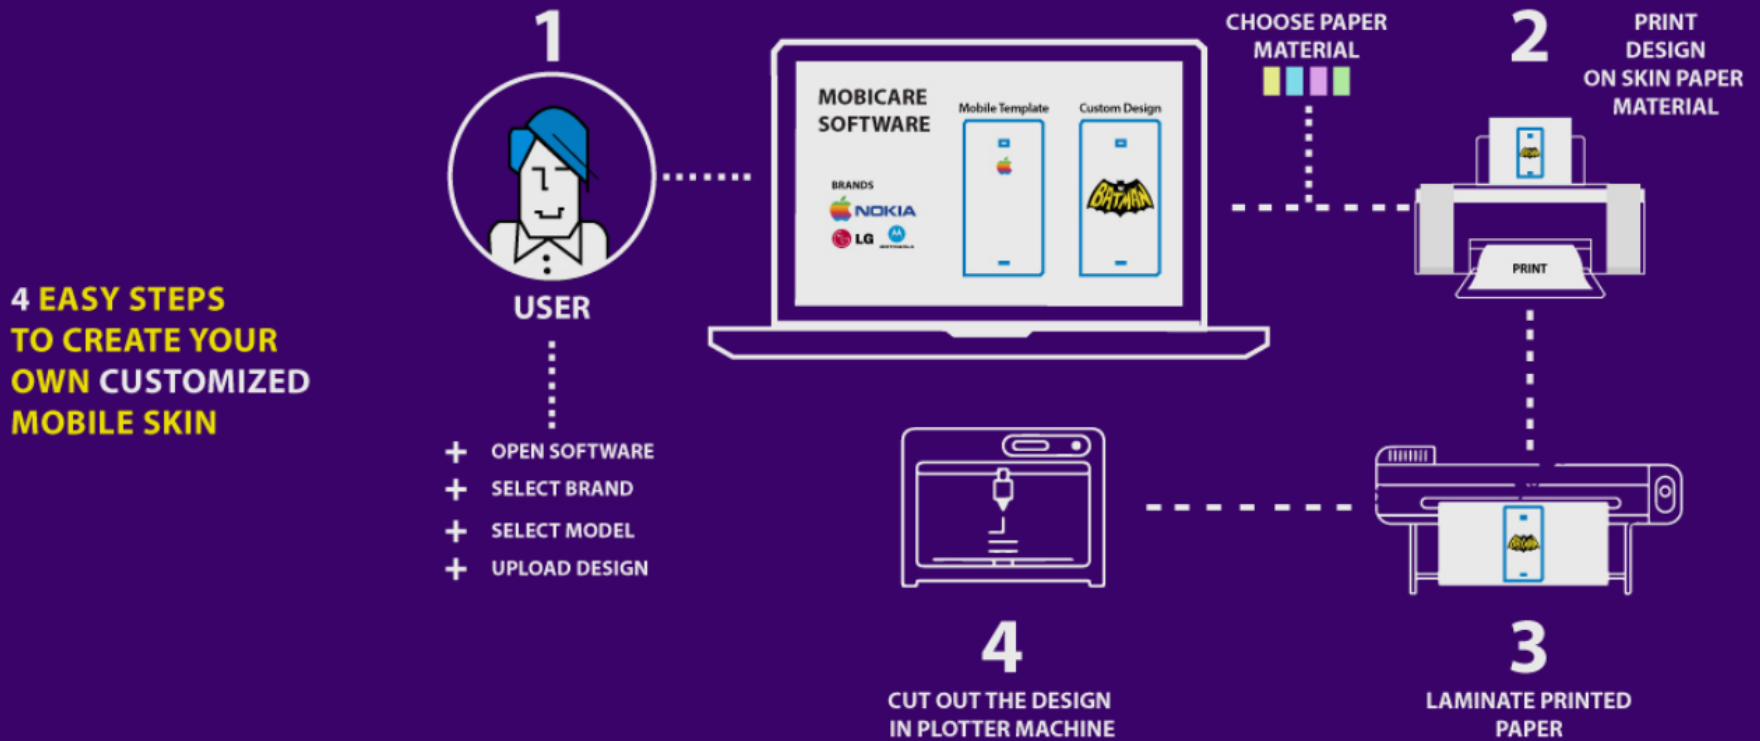

## About Us

We aim at providing highly compatible and customizable ASP.NET MVC & WPF development services that enables your business to surge ahead of the competition.

# Client: Electro Micro Technology Pvt. Ltd.

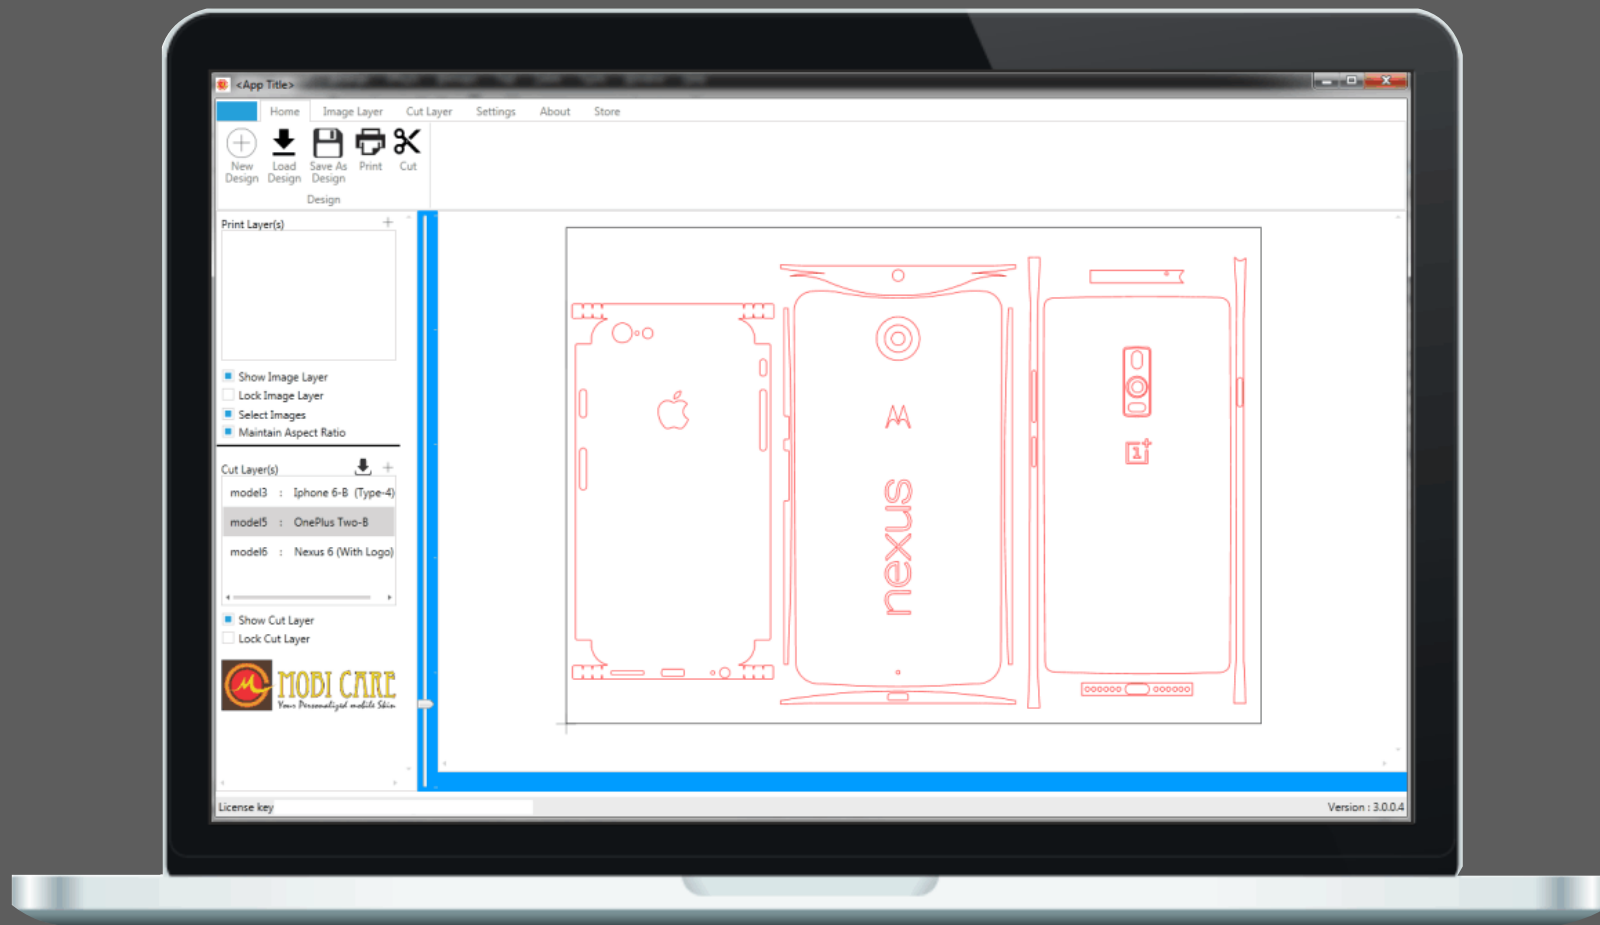

Developed Software: Mobicare Skin  
WPF Development

Mobicare Skin Application is a complete solution for customizing your mobile or tablet, allowing you to dress up your mobile the way you want making it a part of your personality and groove.

# A LOOK INTO OUR DEVELOPED SOFTWARE

MobiCare is a unique and advanced software + hardware combination for the creation of Personalized Mobile Skin for all your digital devices such as tablets and mobile phones. Add to your style statement by custom mobile skin with designer touch and make it a head turner with authentic textured skins that are gorgeous to look at and give a smooth feathery touch.

The mobile skin plotter and personalized mobile skin making machine allows you to make any image or lets you choose from 6000+ templates to be made into a mobile skin or mobile cover with precision engineering for the best fit and bubble free application, to solve the dual purpose of making your gadget scratchproof and also lending it a customized style factor!

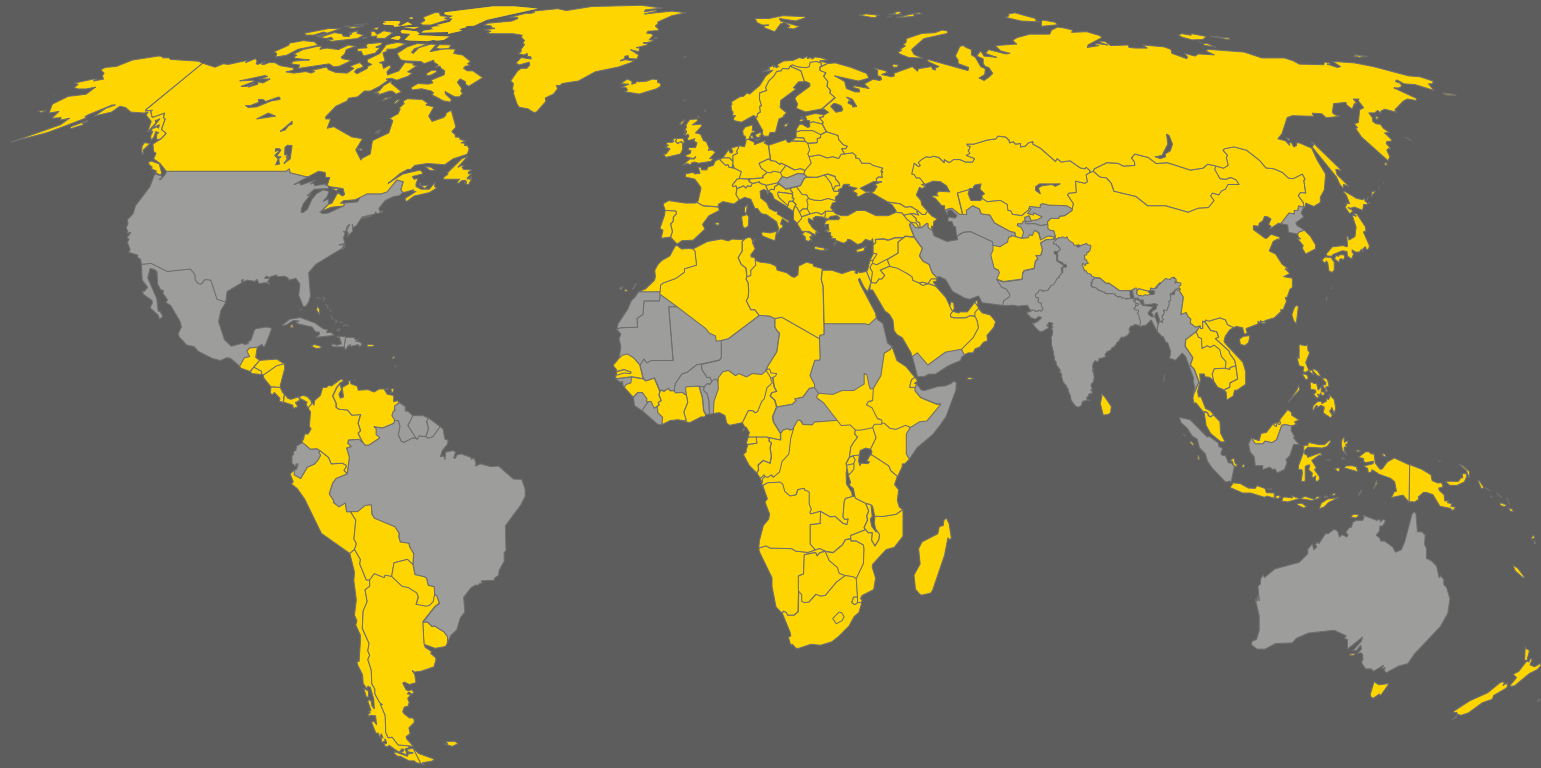

# Software Integration with Hardware

Plotter Machine

- Our software was integrated with client's Plotter Machine
- Precision cutting was achieved by using our software
- Our software was integrated with clients web portal so that our client can keep track of his customers software licencing and version use
- Our team developed this software in WPF framework

While the mobile skin customization software is equipped with an Image Editing Tool + Model Cutting Template preview, offering daily updates and 4000+ cutting templates - covering 35 mobile brands including all its versions, the best part about MobiCare is, unlike other companies who charge 100% payment on loss of software, MobiCare provides better software with online updates which are easily accessible and it contains software lock with a digital key, which can be used on any PC only once, to reinstall the software again.

Electro Micro Technology Pvt. Ltd. is arguably the best mobile skin manufacturer and personalized mobile skin supplier in India and across the globe.
